

## **Beware of phone solicitation asking to discuss your electric supply charges**

May 2, 2019 by

We have received several calls from NYSEG customers who have received voicemails from individuals from unidentified companies to call back with a reference number given. They advise they want to discuss your electric supply charges and to have your utility bill on hand.

These individuals do not represent the Westchester Power Community Choice Aggregation program and you should not give out your account number to anyone unless you initiated the transaction.

Please call our office if you have any questions: 914-216-4967.
