

## IT'S National Drive Electric Week 9/27-10/4!

We have some other exciting news to mark the occasion ...

### Sustainable Westchester & Blink Charging

We have partnered with Blink Charging, a leading owner and operator of electric vehicle (EV) charging equipment and services to promote the build-out of EV charging infrastructure.

Blink and Sustainable Westchester will be advocating and promoting the deployment of Blink's fast level 2 charger, the IQ 200. Sustainable Westchester has been educating and connecting interested municipalities and businesses through Blink Charging to the new NYSERDA and PSC program called Make Ready New York. This program significantly reduces the total cost of installing publicly accessible charging stations, all with Blink's charging equipment. With incentives and Blink's support, Sustainable Westchester's goal is to make EV charging infrastructure reliable and accessible throughout the region and to see one EV in every garage!

To get your charging station initiatives started, please contact Seth Leitman at [seth@sustainablewestchester.org](mailto:seth@sustainablewestchester.org).

*"We are extremely excited to be working with an organization of the caliber of Sustainable Westchester. They are fully committed to bringing EV Infrastructure to the region allowing it to serve as a catalyst for EV vehicle adoption. We believe this partnership can set a standard for businesses to team with the nonprofit and public sectors to develop initiatives to advance the adoption of clean transportation alternatives," stated Brendan Jones, Blink Charging Chief Operating Officer.*

## EXCLUSIVE DEALER DISCOUNTS ARE AVAILABLE

Did you know that the average EV travels over 100+ miles on a single charge and the average daily driver mileage is less than 50 miles? Might it make sense for you to convert to electric? Our Clean Transportation Program goal is to encourage adoption and put one EV in every garage. Exclusive discount programs layered on top of New York State incentives, tax benefits and rebate and rewards programs can help make this feasible and more affordable. To take advantage of these click through to our Clean Transportation page
