

A Message from Westchester Power: Bedford Community Energy Program

As the administrator for Bedford Community Energy program, we'd like to alert you to changes in your electricity supply coming over the next couple of months:

- The current Westchester Power electricity contract (supplied by Eligo Energy) will end by November 30, 2021.
- With the approval of your municipal leadership, in order to secure the best economic value for renewable energy in the current volatile energy market, we will be initiating a competitive bidding process.
- We anticipate reinstating the Westchester Power program in March 2022
- **There will be a brief switch in your enrollment.** You will be switched back to the standard NYSEG electricity supply for the intervening months starting after your **last meter read before November 30th 2021.**
- You will receive (or may have received) a notice in the mail (from NYSEG) alerting you to this switch.
- In January 2022, you will receive a notification letter from the Westchester Power program with the details regarding your re-enrollment to the 100% renewable supply (to start in March 2022)

No action is required at this time.

If you have questions, join us for Community Information Session on 12/8/2021 (@ 12 noon or 6 pm) Drop-in by using the following ZOOM links: <https://tinyurl.com/NYSEGInfoSession1>; <https://tinyurl.com/NYSEGInfoSession2>
