

Jan 2022 (For March enrollment) NYSEG Notification Letters

Each Municipality has 2 versions, one for customers who are in the municipal default supply (Bedford, Lewisboro, North Salem, Pound Ridge - Renewable; Somers - Standard), and another for participants who have switched from the default.

January 15, 2022

The Town of Bedford participates in a Community Energy Program known as Westchester Power, which provides residents and small businesses with a new default electricity supply. **You are receiving this letter because you are a Westchester Power participant and beginning on March 1, 2022 there will be new rates, a new energy company, Constellation New Energy and, consistent with the past, there will be two supply options.** You will be re-enrolled on or after March 1, 2022 unless you choose to opt out [instructions are found below].

WHAT IS WESTCHESTER POWER?

Westchester Power is a community electricity program managed by local nonprofit Sustainable Westchester. The program was established in 2016 and today includes 28 Westchester County municipalities who buy their electricity in bulk to provide low-cost fixed rates. The program provides 100% renewable energy to 100,000 Westchester residents and small businesses (and standard energy to another 10,000 accounts). Yonkers will join in March, bringing the total number of participants to about 145,000.

WHAT ARE THE PROGRAM BENEFITS?

Through its participation, Bedford has enabled its residents and small businesses to access 100% renewable NYS energy through this vetted, proven program without having to sort through dozens of energy service company (ESCO) offerings. The benefits of which are:

- A positive environmental impact resulting in greater community resilience and a healthier environment
- Fixed rates provide cost control and insurance against fluctuating variable NYSEG rates
- Competitive pricing vs. other 100% renewable ESCO pricing
- No contracts, fees, surprise increases or penalty payments

HOW DOES THE PROGRAM WORK?

- There are two supply options: 100% renewable and standard (see sidebar). Bedford has chosen the Renewable Supply Option as the default. **You had previously changed your supply to the standard option and will be enrolled in that option unless you notify us that you would like to change.**
- You may also switch between supply options or leave the program at any time (see sidebar). There are no exit fees with this community electricity program.
- The new rate for your electricity supply will take effect beginning on your first meter-read date on or after March 1, 2022 and will remain fixed until your first meter-read date after November 30, 2023.
- **If you want to be part of the program NO ACTION is required;** your account information, including energy usage data and Assistance Program Participant (APP) status, will be provided to the supplier and you will seamlessly be enrolled after the 30-day period.
- **If you elect to opt-out, return the enclosed card by February 14, 2022 or call Sustainable Westchester/Westchester Power at 914-242-4725.**
- **The power to choose is yours.**

- Opt-out

You may also opt out by returning the accompanying **opt-out reply card**.

SUPPLY OPTIONS

The Westchester Power program is an electricity supply program only. Billing, delivery, and maintenance remain the responsibility of NYSEG. There are two supply options under our program:

- **100% RENEWABLE OPTION:**
Your entire electricity supply is matched by New York State qualified hydropower Renewable Energy Certificates (RECs).
- **STANDARD OPTION:**
Your electricity supply is a mixture of fossil fuels, nuclear, and some renewable energy.

HOW DOES ENROLLMENT WORK?

Just as with standard utility supply that you are used to, participation is on an “opt-out” basis; that is, it does not require any action on your part. Historically, the electricity supply default is designated by the state. Now, the Town of Bedford has designated the Westchester Power program as the default supplier in order to provide access to 100% renewable energy through this vetted, proven community program and offering you additional choice for your energy supply.

2022 RATES

Westchester Power uses a competitive bidding process in order to get the lowest possible rate. Constellation New Energy was the lowest bidder for our 2022 bulk purchase and will show on your NYSEG bill as an ESCO supplier.

The Westchester Power fixed-rate program does not guarantee a savings against the utility’s monthly rates. NYSEG rates vary with the market and cannot be predicted.

Rate Class	Westchester Power 100% Renewable Option	Westchester Power Standard Option	NYSEG 12-month Average*	NYSEG 11/2021 Average
Residential (EL1)	10.179 ¢	8.736 ¢	7.01 ¢	8.42 ¢
Small Commercial (EL2)	10.179 ¢	8.736 ¢	6.89 ¢	8.34 ¢

* From December 2020 to November 2021

HAVE QUESTIONS?

To learn more, join one of the informational webinars on Zoom, February 3rd, 2022 at 12PM or 6PM. **RSVP for the webinar at sustainablewestchester.org/events. Or contact our offices at info@sustainablewestchester.org or call 914-242-4725.**

Westchester Power is an easy and important way to support a clean environment and reduce your carbon footprint. Thanks to our town’s participation, you don’t have to lift a finger to get 100% renewable electricity and we are immediately on course for a healthier future. Thank you!

— Ellen Calves, Bedford Town Supervisor

Sustainable Westchester is a nonprofit consortium of Westchester County municipalities whose goal is to develop and deploy socially responsible, environmentally sound, and economically viable solutions that create resilient, healthy, vibrant, and sustainable communities.

Frequently Asked Questions about Westchester Power

Q: What is the Westchester Power Community Energy Program?

A: Westchester Power enables participating Westchester communities to join together and purchase 100% renewable electricity supply in bulk. Aggregating consumers on a large scale creates the buying power necessary to dictate the terms of our clean energy purchasing. Westchester Power has secured fixed electric supply rates for 29 Westchester municipalities, representing about 115,000 households and small businesses. Since 2016, the aggregate power of the program has reduced CO₂ emissions Countywide equivalent to taking 191,000 cars off the road for one year – it's because of your participation that we are able to make this impact!

Q: How does Westchester Power help to build healthy and resilient communities?

A. Westchester Power is the single greatest contributor to lowering CO₂ emissions in individual communities helping them achieve their climate goals and mitigate the environmental effects associated with climate change. The strength and success of this program is the foundation on which other programs have been built. As examples, Community Solar and clean heating and cooling solutions have been able to build positively on the impact and reduce the use of fossil fuels. These initiatives accelerate the transition to a clean energy future in your community and the County, where it matters most.

Q. How is this different from an energy service company (ESCO)?

A: Westchester Power is a non-profit program (not a commercial endeavor) that has been vetted and sanctioned by your local elected officials and is part of a portfolio of community energy solutions. For more comparative information about Westchester Power vs. ESCOs, go to <https://sustainablewestchester.org/wp>

Q: Who administers Westchester Power?

A: Westchester Power is a program of Sustainable Westchester and in partnership with participating Westchester County municipalities. Sustainable Westchester is a nonprofit 501 (c) (3) consortium of Westchester County local governments. Sustainable Westchester has been authorized by the New York State Public Service Commission as the first Community Choice Aggregation (CCA) program in New York State and acts as the manager, coordinator, and administrator of the program.

Q: Does Westchester Power replace my utility?

A: No, your existing utility (NYSEG) will continue to deliver your power, maintain lines, and respond to service outages. They are required by law to provide the same customer service to all residents regardless of enrollment in this program. You will still receive only one bill from NYSEG, but you will see separate lines for the electricity **supply** (via Westchester Power's supplier, Constellation New Energy.) and electricity **delivery** (via NYSEG). Want to learn more? Our "How to read your NYSEG bill video" is a helpful guide: <https://sustainablewestchester.org/wp/education-and-resources/#bills>

Q: How does Westchester Power procure power?

A: Westchester Power administered a competitive bidding process, soliciting responses from all registered New York suppliers. Constellation New Energy is the supplier for the current contract, beginning March 1, 2022.

Q: How can I be sure Westchester Power will provide energy consistently?

A: Electricity is a highly regulated industry and there are many safeguards against service interruption from supplier error. There is a "grid operator" (called the NYISO) that monitors the grid at the high-voltage level to ensure the proper power is flowing at all times. In addition, the utility remains the "provider of last resort," which means they are obligated to serve any customers whose supplier has failed to buy the requisite power for those customers.

Q: Will I save money by participating in Westchester Power?

A: The program's fixed rates provide rate protection and insurance against utility rate spikes as well as higher energy rates from NYSEG, which may result from the volatility and unpredictable nature of energy trading prices. However, **savings**

cannot be guaranteed, and can only be assessed over the entire period of individual participation, not on a short-term basis. In any given month, NYSEG rates can be higher or lower than our fixed rate.

Q: How does the enrollment process work?

A: Residential and small commercial (those not charged for their peak demand) customers that currently receive electric supply from the utility are automatically enrolled as a default from the municipal participation. Residents or small businesses that are presently under contract with a third party electricity supply company (ESCO) are not enrolled. If you are already signed up with an ESCO, but want to switch to Westchester Power, look at the terms of your existing contract to see when it expires and what (if any) penalties apply for early termination. **If you choose to terminate your contract with the ESCO, you can then enroll in the Westchester Power program.**

Q: What happens if I do not want to participate?

A: **It is absolutely your choice.** You can opt-out at any time by filling out the form enclosed, going online to sustainablewestchester.org/wp or by calling Westchester Power directly at 914-242-4725. They will ask you for the same information seen on that form.

Q: Why am I automatically enrolled if I do not opt-out?

The Public Service Commission rules establish “community choice aggregation” programs, such as Westchester Power, as the default supply for participating municipalities, replacing utility supply (NYSEG). Previously, if you took no action, you would end up with variable rate utility supply. The starting point is the community-selected supply option (as detailed in the letter), but you can switch supply options, switch back to utility supply, or to a private ESCO at any time without any fees or cancellation charges.

Q: Is there a fee for opting-out of Westchester Power?

A: No, there is never a fee or penalty for opting-out.

Q: If I opt-out after the contract has taken effect, how will that affect my service?

A: Service will not be interrupted whatsoever. Note that the switch back to utility supply may take one to two billing periods depending on your billing cycle.

Q: Does Westchester Power supply “green” power?

A: Yes. In fact, 27 of the 29 participating municipalities have set 100% renewable power supply product as the default option helping reduce greenhouse gas emissions and mitigate climate change. The 100% renewable power supply product consists of delivered power matched with NY State hydropower Renewable Energy Certificates (“RECs”). Your municipality chose either standard power or green power as the default supply, but you can freely choose to switch supply options at any time. (Refer to details on the enclosed letter).

Q: How can I learn more or have my specific questions answered?

Sustainable Westchester is a part of the community, and we stand behind our commitment to the program and its long-term benefits. If you have questions or want further information, please give us a call; we will happily spend as much time as you need.

For additional information, email WestchesterPower@SustainableWestchester.org or call (914) 242-4725.

To call your municipality to discuss this CCA, visit www.SustainableWestchester.org to find your community's CCA liaison.

January 15, 2022

The Town of Lewisboro participates in a Community Energy Program known as Westchester Power, which provides residents and small businesses with a new default electricity supply. **You are receiving this letter because you are a Westchester Power participant and beginning on March 1, 2022 there will be new rates, a new energy company, Constellation New Energy and, consistent with the past, there will be two supply options.** You will be re-enrolled on or after March 1, 2022 unless you choose to opt out [instructions are found below].

WHAT IS WESTCHESTER POWER?

Westchester Power is a community electricity program managed by local nonprofit Sustainable Westchester. The program was established in 2016 and today includes 28 Westchester County municipalities who buy their electricity in bulk to provide low-cost fixed rates. The program provides 100% renewable energy to 100,000 Westchester residents and small businesses (and standard energy to another 10,000 accounts). Yonkers will join in March, bringing the total number of participants to about 145,000.

WHAT ARE THE PROGRAM BENEFITS?

Through its participation, Lewisboro has enabled its residents and small businesses to access 100% renewable NYS energy through this vetted, proven program without having to sort through dozens of energy service company (ESCO) offerings. The benefits of which are:

- A positive environmental impact resulting in greater community resilience and a healthier environment
- Fixed rates provide cost control and insurance against fluctuating variable NYSEG rates
- Competitive pricing vs. other 100% renewable ESCO pricing
- No contracts, fees, surprise increases or penalty payments

HOW DOES THE PROGRAM WORK?

- There are two supply options: 100% renewable and standard (see sidebar). Lewisboro has chosen the Renewable Supply Option as the default. **You had previously changed your supply to the standard option and will be enrolled in that option unless you notify us that you would like to change.**
- You may also switch between supply options or leave the program at any time (see sidebar). There are no exit fees with this community electricity program.
- The new rate for your electricity supply will take effect beginning on your first meter-read date on or after March 1, 2022 and will remain fixed until your first meter-read date after November 30, 2023.
- **If you want to be part of the program NO ACTION is required;** your account information, including energy usage data and Assistance Program Participant (APP) status, will be provided to the supplier and you will seamlessly be enrolled after the 30-day period.
- **If you elect to opt-out, return the enclosed card by February 14, 2022 or call Sustainable Westchester/Westchester Power at 914-242-4725.**

- Competitive pricing vs. other 100% renewable ESCO pricing
- No contracts, fees, surprise increases or penalty payments

HOW DOES THE PROGRAM WORK?

- There are two supply options: 100% renewable and standard (see sidebar). North Salem has chosen the Renewable Supply Option as the default. **You had previously changed your supply to the standard option and will be enrolled in that option unless you notify us that you would like to change.**
- You may also switch between supply options or leave the program at any time (see sidebar). There are no exit fees with this community electricity program.
- The new rate for your electricity supply will take effect beginning on your first meter-read date on or after March 1, 2022 and will remain fixed until your first meter-read date after November 30, 2023.
- **If you want to be part of the program NO ACTION is required;** your account information, including energy usage data and Assistance Program Participant (APP) status, will be provided to the supplier and you will seamlessly be enrolled after the 30-day period.
- **If you elect to opt-out, return the enclosed card by February 14, 2022 or call Sustainable Westchester/Westchester Power at 914-242-4725.**
- **The power to choose is yours.**

SUPPLY OPTIONS

The Westchester Power program is an electricity supply program only. Billing, delivery, and maintenance remain the responsibility of NYSEG. There are two supply options under our program:

- **100% RENEWABLE OPTION:** Your entire electricity supply is matched by New York State qualified hydropower Renewable Energy Certificates (RECs).
- **STANDARD OPTION:** Your electricity supply is a mixture of fossil fuels, nuclear, and some renewable energy.

HOW DOES ENROLLMENT WORK?

Just as with standard utility supply that you are used to, participation is on an “opt-out” basis; that is, it does not require any action on your part. Historically, the electricity supply default is designated by the state. Now, the Town of North Salem has designated the Westchester Power program as the default supplier in order to provide access to 100% renewable energy through this vetted, proven community program and offering you additional choice for your energy supply.

2022 RATES

Westchester Power uses a competitive bidding process in order to get the lowest possible rate. Constellation New Energy was the lowest bidder for our 2022 bulk purchase and will show on your NYSEG bill as an ESCO supplier.

The Westchester Power fixed-rate program does not guarantee a savings against the utility’s monthly rates. NYSEG rates vary with the market and cannot be predicted.

Rate Class	Westchester Power 100% Renewable Option	Westchester Power Standard Option	NYSEG 12-month Average*	NYSEG 11/2021 Average
Residential (EL1)	10.179 ¢	8.736 ¢	7.01 ¢	8.42 ¢
Small Commercial (EL2)	10.179 ¢	8.736 ¢	6.89 ¢	8.34 ¢

* From December 2020 to November 2021

“ I am very proud of our North Salem residents, who with leadership from our Town Board, are investing in our energy future by committing to renewable energy for their homes and businesses through Westchester Power. Westchester Power is not some random third-party organization we are working with. Westchester Power was created by municipalities to handle just this problem. Simply put “Westchester Power is us” and in its leadership role its programs are having a positive impact on our environment, our community and renewable energy legislation in our State. By aggregating our power needs we are able to buy clean renewable energy at competitive rates and make a difference. ”

—Warren Lucas, North Salem Town Supervisor

Sustainable Westchester is a nonprofit consortium of Westchester County municipalities whose goal is to develop and deploy socially responsible, environmentally sound, and economically viable solutions that create resilient, healthy, vibrant, and sustainable communities.

The Town of North Salem participates in a Community Energy Program known as Westchester Power, which provides residents and small businesses with a new default electricity supply. **You are receiving this letter because you are a Westchester Power participant and beginning on March 1, 2022 there will be new rates, a new energy company, Constellation New Energy and, consistent with the past, there will be two supply options.** You will be re-enrolled in the supply option selected by your municipality on or after March 1, 2022 unless you choose to opt out [instructions to do so are included within].

WHAT IS WESTCHESTER POWER?

Westchester Power is a community electricity program managed by local nonprofit Sustainable Westchester. The program was established in 2016 and today includes 28 Westchester County municipalities who buy their electricity in bulk to provide low-cost fixed rates. The program provides 100% renewable energy to 100,000 Westchester residents and small businesses (and standard energy to another 10,000 accounts). Yonkers will join in March, bringing the total number of participants to about 145,000.

WHAT ARE THE PROGRAM BENEFITS?

Through its participation, North Salem has enabled its residents and small businesses to access 100% renewable NYS energy through this vetted, proven program without having to sort through dozens of energy service company (ESCO) offerings. The benefits of which are:

- A positive environmental impact resulting in greater community resilience and a healthier environment
- Fixed rates provide cost control and insurance against fluctuating variable NYSEG rates
- Competitive pricing vs. other 100% renewable ESCO pricing
- No contracts, fees, surprise increases or penalty payments

HOW DOES THE PROGRAM WORK?

- There are two supply options: 100% renewable and standard (see sidebar). North Salem has chosen the Renewable Supply Option as the default. You will be enrolled in this option unless you choose to switch or opt-out.
- You may also switch between supply options or leave the program at any time (see sidebar). There are no exit fees with this community electricity program.
- The new rate for your electricity supply will take effect beginning on your first meter-read date on or after March 1, 2022 and will remain fixed until your first meter-read date after November 30, 2023.
- **If you want to be part of the program NO ACTION is required;** your account information, including energy usage data and Assistance Program Participant (APP) status, will be provided to the supplier and you will seamlessly be enrolled after the 30-day period.
- **If you elect to opt-out, return the enclosed card by February 14, 2022 or call Sustainable Westchester/Westchester Power at 914-242-4725.**

Your entire electricity supply is matched by New York State qualified hydropower Renewable Energy Certificates (RECs).
- **STANDARD OPTION:**
Your electricity supply is a mixture of fossil fuels, nuclear, and some renewable energy.

HOW DOES ENROLLMENT WORK?

Just as with standard utility supply that you are used to, participation is on an “opt-out” basis; that is, it does not require any action on your part. Historically, the electricity supply default is designated by the state. Now, the Town of Somers has designated the Westchester Power program as the default supplier and has chosen the Standard supply, but you have the option to switch into the 100% Renewable supply by contacting Sustainable Westchester by phone or online.

2022 RATES

Westchester Power uses a competitive bidding process in order to get the lowest possible rate. Constellation New Energy was the lowest bidder for our 2022 bulk purchase and will show on your NYSEG bill as an ESCO supplier.

The Westchester Power fixed-rate program does not guarantee a savings against the utility’s monthly rates. NYSEG rates vary with the market and cannot be predicted.

Rate Class	Westchester Power 100% Renewable Option	Westchester Power Standard Option	NYSEG 12-month Average*	NYSEG 11/2021 Average
Residential (EL1)	10.179 ¢	8.736 ¢	7.01 ¢	8.42 ¢
Small Commercial (EL2)	10.179 ¢	8.736 ¢	6.89 ¢	8.34 ¢

* From December 2020 to November 2021

HAVE QUESTIONS?

To learn more, join one of the informational webinars on Zoom, February 3rd, 2022 at 12PM or 6PM. **RSVP for the webinar at sustainablewestchester.org/events. Or contact our offices at info@sustainablewestchester.org or call 914-242-4725.**

Somers residents and small businesses have been participating in this innovative community electric supply program for over five years now, and I’m happy to see that it continues to serve them well, offering an easy pathway to renewable energy.

— Robert Scorrano, Somers Town Supervisor

Sustainable Westchester is a nonprofit consortium of Westchester County municipalities whose goal is to develop and deploy socially responsible, environmentally sound, and economically viable solutions that create resilient, healthy, vibrant, and sustainable communities.

ENABLING OTHER MONEY SAVING PROGRAMS VIA SUSTAINABLE WESTCHESTER:

COMMUNITY SOLAR

No panel installation, fees or cost. Solar with savings up to 10% on your electricity bill!

EnergySmart HOMES

Home energy efficiency; fossil-fuel free heating & cooling solutions that create comfort & generate savings!

Your participation has made a positive impact

SINCE 2016, WE HAVE OFFSET 880,000 METRIC TONS OF CARBON DIOXIDE EQUIVALENT TO:

191,000 cars taken off the road for 1 year

OR

14.6 million tree seedlings grown for 10 years
