

**SUSTAINABLE WESTCHESTER
WESTCHESTER POWER AND COMMUNITY SOLAR - DOUBLE YOUR CLEAN ENERGY IMPACT**

Allowing Westchester County residents and local organizations to double their positive renewable energy impact and increase control over electricity costs!

What is Sustainable Westchester?

Sustainable Westchester is a non-profit organization based in Mount Kisco, with a strong focus on making renewable, clean, and local sustainable energy more accessible to Westchester residents, organizations, and municipalities, providing savings wherever possible!

Sustainable Westchester proudly offers two renewable energy programs that residents can join to support clean energy in New York State:

1. **Westchester Power** provides residents and local organizations (including small businesses) electric customers a locally chosen, 100% renewable electricity supply alternative to the state-mandated utility—Con Edison or NYSEG—for electricity supply. It enables its 29 participating Westchester County municipalities to provide 100% renewable electricity supply to its local participants. Westchester Power offers a fixed rate for supply, as opposed to the fluctuating rates of the utility supply, providing stability and cost control. Electricity supply simply describes the electricity used by residents and others.

By joining together collectively through participation in the Westchester Power program, communities can dramatically increase the use of renewable electricity versus traditional fossil-fuel-based electricity and can do that at a rate that is competitive. Around 150,000 residents and small businesses are participating in Westchester Power.

2. **Community Solar** allows residents and eligible organizations, houses of worship, and small businesses to subscribe to a local solar farm and save up to 10% off of electricity bills. Solar farms are typically located on large rooftops. The energy generated by one's solar farm becomes a solar credit that lowers one's electricity bills. Community Solar is free to join, and there is no fee to cancel anytime. Participants that sign up to Community Solar will join neighbors and others to save in a two-step process: (1) earn a monthly solar credit that lowers one's electricity bill, and (2) auto-pay your solar farm for 90% of that solar credit, saving 10% of the solar credit! You will save in this program - up to 10% off your total monthly electric bills!

**The best part? You can participate in BOTH clean energy programs if you choose!
Double your green impact to increase savings.**

If I join Community Solar and Westchester Power, how does that work?

Westchester Power and Community Solar both support renewable energy and appear on participants' electric bills. They were designed to be complementary programs that support NYS clean energy, but in slightly different ways.

Westchester Power provides participants with electricity supply that powers their homes. Community Solar provides participants with a solar credit on their electricity bills. Community solar and electricity supply is that community solar provides a monetary credit on electric bills, whereas electricity supply (Westchester Power) provides the supply of electricity that also appears on one's bill.

Will my bill look different now?

Only slightly. Below is an example of a ConEd and NYSEG bill. You will now see a new section to show how much of a solar credit you earned through community solar. You will also see a line item detailing what your cost was for the Westchester Power - ESCO (energy supply company).

STEP ONE: You get your utility bill, with (1) a line item for Westchester Power electricity supply charges, and (2) a line item for community solar credits that reduce your bill.

Watch Cumulative Savings as it Grows Each Month!

Dear

Thank you for being a part of our community solar program! You are helping power your local community with renewable sources.

As a result of your participation, you have received a credit of **\$175.97 on your latest Consolidated Edison bill**. You will see this amount credited to your Consolidated Edison bill.

Solar Credit Earned This Month

PowerMarket will therefore be debiting the billing account you have on file with us **\$158.37 (90% of the credit above) later this month**. This payment will show as a line item on your upcoming bank statement.

From your participation, you've saved **\$17.60 on this month's utility bill!**

As always, you can track your ongoing savings, environmental impact and manage your account from your [dashboard](#).

If you have any questions, please call the friendly folks in our customer service department at 1-800-253-4333.

Sincerely,
 The PowerMarket Team
